

CHARGE READY TRANSPORT

Clean Energy to Fuel Southern California's Electric Vehicle Truck and Bus Fleets

SCE's Charge Ready Transport (CRT) Program offers low-to no-cost electrical system upgrades to support the installation of electric vehicle (EV) charging equipment for qualifying vehicles. This program provides a unique opportunity for fleet operators choosing to acquire electric vehicles by providing support and reducing the costs with installing the necessary charging equipment.

When a customer is approved to participate in the program, SCE will design, construct, and install the necessary infrastructure on both the utility-side and customer-side of the electric meter. If the customer prefers, they can perform the customer-side of the meter electrical work and receive a rebate. Additional rebates are available to school districts, transit agencies, and eligible companies within disadvantaged communities.

This program provides a great opportunity for fleet owners and other operators of industrial vehicles including:

- Medium and heavy-duty trucks, shuttles, and vans
- Transit buses
- School buses
- Transportation refrigeration units
- Airport ground support equipment
- Port equipment
- Forklifts and other off-road equipment

Program Highlights¹

SCE will:

- Perform on-site visits to evaluate site's electrical infrastructure needs.
- Develop utility-side and customer-side of the meter cost estimates.
- Design, secure permit, project manage and install the necessary infrastructure. Participants will have the option to instead perform the necessary work on their side of the meter and receive a make-ready rebate.²
- Install a separate meter dedicated to the EV charging infrastructure and waive customer demand charges through 2030 for EV rates TOU-EV-8 and TOU-EV-9.
- Make final inspections once the charging equipment is installed.

Customer Requirements:

- Lease or purchase at least two medium or heavy-duty battery powered EVs or convert at least two fossil-fuel vehicles to electric.
- Select, purchase and install SCE approved charging equipment in the quantity approved by SCE.
- Keep the charging equipment operational for at least ten years.
- Provide data related to charging equipment usage for a minimum of five years (on-road vehicles only).
- Grant easement may be required.

Interested? Let's talk.

Call your SCE Account Manager or email chargereadytransport@sce.com if you have questions or want to find out how this program may work for your business.

You can also visit [sce.com/CRT](https://www.sce.com/CRT) for more information.

¹ Additional terms & conditions apply.

² SCE will provide a rebate of the lesser of 80% of the customer participant actual installation cost or 80% of SCE's average direct cost for installing the customer-side make-ready infrastructure.
