RE: Riggin between Akers and Kayenta

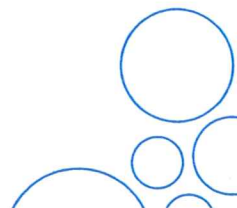

Gentlemen:

The estimated cost of installing 6 Fire Hydrants and 1 irrigation service at Riggin between Akers and Kayenta in Visalia is \$156,731.00 including \$1,836.00 for state and federal taxes.

You have made an advance deposit of \$1,000.00. Please remit your check in the amount of \$155,731.00 to California Water Service at 216 N. Valley Oaks Drive, Visalia CA 93292. Form W-9's are attached for your convenience.

Upon completion of the work, adjustment will be made for any difference between the estimated installation and income tax cost (amount deposited) and the actual cost of the work. Should it be necessary to make the main connection/installation after hours or on a weekend it may result in a cost overrun. If the actual cost is less than the amount deposited, the difference will be refunded to the applicant. **If the actual cost is more than the amount deposited, the applicant will be invoiced for the difference.** The facilities installed will be owned by California Water Service.

If additional sources of water supply, irrigation service, and/or multiple services are on the property section I, page I-4 of the State of California Health and Welfare Agency Guidance Manual for Cross Connection Control states that "The water user (property owner or consumer) has the primary responsibility to keep contaminants out of the potable water system. This responsibility begins at the user connection and includes any and all water distribution piping on the premises. If a cross connection or the potential for a cross connection exists the water user shall install, have tested, and maintain backflow preventers at his own expense as directed by the water supplier or the health agency. The water user should be careful not to create cross connections when modifying his plumbing system."

CALIFORNIA WATER SERVICE

If an easement(s) is required, it is the developer's responsibility to have the easement description written along with a plat drawing and submitted to California Water Service Company for review and approval. Once approved, the written description will need to be on our "Right of Way for Pipeline" form.

The applicant is responsible for marking any easements, rights of ways, or property lines in the field.

Please indicate your acceptance of the foregoing terms and conditions by signing at the bottom on the enclosed duplicate of this letter, returning one copy to this office with the required balance due deposit.

Should you have any questions or need additional information please call 559-624-1621.

Sincerely,

Sedelia Sanchez
Superintendent
