IV. **LANDSCAPE AND LIGHTING MAINTENANCE ACREAGE POLICY**

The City of Visalia enacted a Landscape and Lighting Maintenance Acreage Policy which applies to all Landscape and Lighting Maintenance Districts (Quadrants). This policy became effective June 19, 2023.

Landscape and Lighting Maintenance Acreage Policy

The objective of this policy is to achieve a high level of service for each City managed Landscape and Lighting District by following the parameters set forth.

1. Contractors will be allowed to bid on and maintain up to 60-acres of Landscape and Lighting Districts for the City of Visalia.
2. Contractors that have reached the Landscape and Lighting District 60-acre maintenance limit will be allowed to maintain acreage over 60-acres only when that overage is added to an existing landscape maintenance contract due to new construction or the reorganization of a new maintenance district.

This exception will only apply for the duration of the current maintenance contract.

3. Landscape Maintenance contractors are limited to a maximum of 60-acres of territory in the City of Visalia. If a Contractor is not yet at the 60-acre threshold and wishes to bid on additional acreage the Contractor may bid on those. If, however, said Contractor is the lowest bidder for various Quadrants and award of those Quadrants would push his acreage over the threshold of 60-acres, the Contractor will be allowed to select which Quadrant he wishes to be awarded, and that would keep the contractor at, or below the 60-acre limit. The remaining Quadrants will be awarded to the 2nd lowest bidder (provided that Bidder is also under the 60-acre threshold and meets all other specifications)
4. Bids received from contractors to maintain additional Landscape and Lighting Districts that currently have Landscape and Lighting District maintenance contracts with the City of Visalia will not be accepted if the acreage places the contractor over the 60-acre limit.

V. CONTRACT ACCEPTANCE AFTER AWARD

Contract Acceptance: After award of the contract, the Contractor will inspect and review current landscape and irrigation conditions of the project areas. The Contractor must provide a statement summarizing the status of the current landscape conditions and irrigation system along with a cost estimate to make the necessary corrections and present them to the Project Manager for review. The Project Manager will schedule a meeting with the Contractor to review the current landscape and irrigation conditions of the project work areas and agree to a resolution and approval of the project areas. The Project Manager will provide a statement summarizing the resolution of the current landscape conditions and irrigation system and must be executed by the Contractor as stated below.

Acceptance of contract will be done in phases:

Phase 1: 10 acres or less the contractor will have (30) thirty days to inspect all areas and provide summary of conditions to the Project Manager for a resolution. Once the resolution is agreed upon the contract will accept the conditions and complete the resolutions within (4) four months of contract providing all material receipts and labor costs as agreed.

Phase 2: 10 to 20 acres the contractor will have (60) sixty days to inspect all areas and provide summary of conditions to the Project Manager for a resolution. Once the resolution is agreed upon the contract will accept the conditions and complete the resolutions within (5) five months of contract providing all material receipts and labor costs as agreed.

Phase 3: 30 or more acres the contractor will have (90) ninety days to inspect all areas and provide summary of conditions to the Project Manager for a resolution. Once the resolution is agreed upon the contract will accept the conditions and complete the resolutions within (6) six months of contract providing all material receipts and labor costs as agreed.

At least sixty (60) days prior to the renewal of the contract a revised statement summarizing the landscape conditions and irrigation system of the project work area must be prepared by the City's project manager and executed by the Contractor.

The City will conduct regular inspections of the landscaping work by the Contractor and issue observed "Out of Compliance" reports to the Contractor. The Contractor will be required to review and remedy the observed "Out of Compliance" issues of those observed areas of the inspection reports by the City. This does not relinquish the contractor of any responsibility to inspect and ensure that all areas maintained by the contractor are compliant as outlined in the contract.

Sixty (60) Days prior to annual contract renewal or termination of contract, all landscape repairs and replanting requested by the City's Project Manager must be complete. Any work left in an unacceptable condition will be cause for delay of final payment to Contractor until such time as the City has repairs and replanting completed. Final payment will be reduced by the cost of these repairs and replanting.

VI. SCOPE OF WORK/SERVICES

A. STANDARD REQUIREMENTS AND LEVEL OF SERVICE

Maintenance of areas must include if applicable, but not be limited to, pruning, shaping and training of trees, shrubs and ground covers; fertilization; weed control; litter control; control of all plant diseases and pests; mowing; maintenance of irrigation system; and all other duties required to keep the area(s) in safe, attractive, usable condition and maintain plant and turf condition with horticulturally acceptable growth and color and as otherwise described herein. **Landscape Maintenance for the City of Visalia must be "priority work" for the successful contractor. Contractor must have sufficient equipment and employees to complete the work in accordance with the specifications and requirements of this Invitation to Bid.**

LEVELS OF SERVICE

The City of Visalia prefers the highest level of service for all areas of the Quadrant. Most areas in all Quadrants have funding that can support the highest level of service. However, there are rare instances when the available funding in a particular area of a Quadrant will require the City to reduce the costs for that area by reducing the level of service (frequency of service) for that area. Therefore, the City of Visalia reserves the right to assign a service level of less frequency (Level B or Level C Service) to specific areas of a Quadrant when City deems necessary.

The City will provide the Contractor with 30 days advance written notice listing the area and square footages for which service shall be reduced and the effective day of service reduction. City will also automatically reduce the contract payment amount for those specific areas according to the table below which shows the reduction for Level B and Level C.

Service Level	Frequency of Service	Number of Services Annually	Percentage by which Contractor's price will be reduced
A	Once per week intervals	52	-
B	Two-week intervals	26	25%
C	Once per month intervals	12	33%

1. **Standards.** Contractor must perform services in a manner commensurate with the highest quality professional standards of the landscape maintenance profession, using qualified and experienced personnel and high-quality equipment and materials.

The specifications and standards must be met by Contractor at all times regardless of Contractor's employees' absence or established staffing pattern and levels.

2. **Working Day.** The contractor's activities must be confined to the hours between 6:00 a.m. PST and 6:00 p.m. PST, Monday through Friday, excluding holidays. Deviation from these hours will not be permitted without the prior written consent of the City, except in emergencies involving immediate hazard to persons or property.

- No normal and routine maintenance operations that cause excessive noise shall be performed before 7:00 a.m.

- All or some locations may require blowing of parking lots and other hardscape areas prior to normal business hours of 8 a.m. PST to avoid materials being blown onto private vehicles and customers, i.e., Civic Center, and other customer-based facilities.

Contractor shall comply with the City of Visalia's Municipal Code, Title 8 Health and Safety, Chapter 8.36 Noise. The City of Visalia Municipal Code can be found at www.visalia.city.

3. **Company Identification.**

- All employees must wear uniforms or other identifying clothing, to make clear to all observers that they are employed by the contractor.
- All vehicles (trucks, etc.) used in the course of fulfilling this contract shall have appropriate company identification, visible to all observers, to identify vehicles as being owned by the contractor.

4. **Professional Conduct.** Contractor and contractor's employees must conduct themselves professionally at all times in public and when dealing with City staff and/or Visalia citizens. This will include but not be limited to refraining from using profane or vulgar language in public areas while performing work under this agreement. Contractor and contractor's employees will also afford residents and citizens the utmost courtesy and respect at all times.

5. **Property Owner Concerns.** Contractor must make every attempt to satisfactorily address concerns and issues presented by residents of the district. As soon as the contractor is aware of a resident concern either directly or indirectly, the contractor shall immediately inform the Project Manager of the concern (including the resident's name and phone number if possible), and what action was taken or will be taken by the contractor to address the concern.

Failure of the Contractor to abide by these terms and meet addressed concerns of the Quadrant's residents will result in a \$100 liquidated damages assessment or contract termination. The amount of damages for these types of issues is difficult to estimate, therefore a \$100 liquidated damages assessment (per incident) shall represent costs incurred by the City in responding to complaints concerning the Contractor.

6. **Mowing** All Turf areas covered by this contract shall be mowed at the intervals established by the Level of Service assigned to the area (Level A, Level B or Level C Service).

7. **Watering.** Irrigation systems must be maintained, repaired, and adjusted to prevent wetting of adjacent streets and water waste during the irrigation cycle.

Contractor shall follow the City's and State's water regulations. There will be a liquidated damage assessment of \$100 per incident or termination of contract if multiple or gross violations occur in recognition of the importance of water conservation. The amount of damage for these types of issues is difficult to estimate and therefore, \$100 shall represent costs incurred by the City in responding to complaints concerning the Contractor.

8. **Signage.** All regulatory park, street, and traffic signs, trail head signs, city information signs, botanical garden signs, donation monuments or stones, individual plant placards, etc., must be kept clean and clear of plant materials, dirt and dust, graffiti, and animal and bird excrements.

9. **Chemicals.** The City reserves the right to reject any chemicals Contractor and/or their subcontractors propose to use, prior to or during actual use. **Safety Data Sheets (S.D.S.) shall be provided to City prior to award of contract and in case of changes after award of contract at least thirty (30) days prior to usage by Contractor for any chemicals while performing this contract.**

Materials shall be non-staining, non-corrosive, and shall not leave a flammable residue. Contractor shall not use pesticides in Category 1 (no chemicals with LD50 levels lower than 500 mg/kg). These would include, but not be limited to, several organophosphate and carbamate possessing high mammalian toxicity due to their intense anticholinesterase activity.

Pesticides in Category II may be used with the authorization of the Project Manager.

Contractor shall, as part of the required monthly report to the City, prepare a Chemical Use and Proposed Work Report to indicate in writing the amount, type, and location of all chemicals used. **If no chemicals are used, then the report must still be submitted indicating to the City that no chemicals were used.**

10. **Fertilizer.** Short release fertilizer: Only commercial fertilizer containing ten percent (10%) or more nitrogen (N), available phosphoric acid (P2O5) or eight percent (8%) soluble potash (K2O), singly or collectively may be used. Generally, 16-6-8 would be nitrogen coming from an ammoniacal or nitrogen source. A slow-release fertilizer shall have at least half of the nitrogen coming from a coated slow-release nitrogen source.

Fertilization will be on an as needed basis. Project Manager will request a quote for cost of additional services from time to time when services are needed.

11. **Clean-up.** All areas covered by the contract must be kept free of debris and potential safety hazards generated by but not limited to, leaves, grass clippings, pruning, weeding, trimming, and other operations of the contractor, as well as bottles, cans, trash and paper and other yard waste. All trash and debris are to be removed and disposed of at intervals established by the Level of Service assigned to the area and at the contractor's expense.
12. **Emergency Response.** Contractor must be able to respond immediately to emergencies. Emergencies are generally construed as those events that in the opinion of City staff constitute an **immediate danger or hazard to property or persons**, or that significantly violate water conservation requirements. If the emergency condition is identified and the contractor is notified (either through discovery or by contact from City personnel) during normal work hours, the contractor must respond to the emergency within **two hours** unless otherwise specified. If discovery or notification occurs after normal working hours, the contractor must respond by 10am on the following working day.

Contractor must provide some acceptable method by which contact can be made in case of emergency, i.e., paging system, cell phone, etc. and shall also provide a method by which non-emergency messages can be received during the workday, i.e., phone messages, email, etc.

13. **Reporting and Inspections**

Status Reports

- a. **A written report is to be prepared by the Contractor and given to the Project Manager monthly.** The report shall include a description of unusual circumstances, locations of any homeless encampments that are found in areas being maintained by the Contractor, lighting that is inoperable, major irrigation breaks, safety hazards, etc. For emergencies and safety hazards, the Project Manager is to be called immediately. Failure to provide a report may result in a \$100 penalty per incident or termination of contract if multiple incidents are noted. The reports are important especially if they are safety hazards. Amount of damages for these types of issues are difficult to estimate. Therefore, \$100 per incident shall represent costs incurred by the City in responding to complaints concerning the Contractor.
- b. **The Contractor must schedule a meeting with the Project Manager no less than once per month** to review the work site to ensure compliance with the contract specifications and standards. At this meeting, Contractor or Contractor's supervisor shall sign the meeting

attendance and inspection reports prepared by the City, provide all chemical use and proposed use reports, irrigation inspection and schedule changes, and usage and/or proposed fertilizer usage reports and discuss major accomplishments for the previous month, notable problems, schedule changes and goals and deadlines for the coming month. The Project Manager shall discuss areas out of compliance and options to bring areas back into compliance with contractor. Project Managers shall discuss any penalties to the contractor and/or intentions to withhold payment of invoices. Project Manager shall document these meetings. Failure to attend these meetings may be cause for a \$100 penalty per incident or termination of contract if Contractor has failed to meet with City staff after multiple attempts to discuss gross breaches of duty.

- c. **The Project Manager shall report any maintenance deficiencies to Contractor. Contractor must correct any deficiencies at Contractor's cost within five (5) working days of written notification.** Unusual horticultural problems such as pests, disease, and damages that are beyond the scope of Contractor's responsibility shall be brought to the attention of Project Manager.
- d. **A Chemical Use and Proposed Work Report must be completed for each chemical application and proposed application. These reports shall be submitted each month during contractor's monthly meeting with City's Project Manager.** Failure to submit reports may delay the City's payment to Contractor and be cause for a liquidated damage assessment of \$100 per incident. The amount of damage and costs to the City for these types of issues is difficult to estimate and therefore, \$100 shall represent costs incurred by the City in responding to incidents where the City was unsure of what chemicals were applied by the Contractor. The Contractor is responsible for submitting chemical usage reports to the County Agricultural Department. Copies are to be sent to the Project Manager as part of the Contractor's monthly report.
- e. Monthly Irrigation Inspection reports (described below), irrigation schedule changes, and contractor signed landscape inspections from the City must be submitted with monthly invoice before payment will be made. Failure to submit all reports may delay the City's payment to Contractor.

B. LANDSCAPE MAINTENANCE – SPECIFICATIONS

- 1. **Irrigation.** Irrigation must be done with the use of automatic or manual sprinkler systems where available and operable, unless outlined in the initial acceptance inspections for repairs. These areas will be addressed with Contractor during initial inspection and noted for regular monthly inspections. Failure of an existing system to provide full and adequate coverage after Contractor signs Notice of Acceptance shall not relieve the contractor of the responsibility to provide proper coverage of all areas. **Providing any supplementary hoses, sprinklers, nozzles, etc. necessary to accomplish proper coverage shall be the contractor's responsibility.** Exclusions will be identified in description of areas and will be addressed with Contractor during initial inspection. Original brand and size of heads and nozzles will be used in replacement of vandalized or faulty heads in turf and planter areas.

Contractor is responsible for all repairs to the irrigation system starting at the City side of the water meter, with the exception of the **testing of the back flow** and **repair/replacement of the irrigation controller**. Original, or equivalent, brand and size of heads and nozzles will be used in replacement of vandalized or faulty heads in turf and planter areas.

- a. **Maintenance.** At all times, Contractor must maintain all sprinkler systems in such a way as to give proper coverage and full working capacity, making whatever adjustments or repairs necessary to maintain healthy turf, plant growth, prevent dry spots in turf, plants, and

shrubs, and prevent excessive run-off into streets or other areas not intended to be irrigated. Care must be taken to prevent wasting water, causing soil erosion, or allowing seepage into existing underground improvements or structures.

The contractor shall keep controllers and valve boxes free of dirt and debris; repair, replace, clean, adjust, straighten, raise, or lower the following sprinkler system components:

- Sprinkler heads
- Sprinkler risers
- Quick coupler valve boxes
- Hose bib boxes
- Remote control valves
- Remote control valve boxes and covers
- Maintain and replace batteries in battery operated controllers on a continual basis
- All irrigation wiring should be maintained to City standards including proper splices using DBR/Y-6 splice kits
- Proper solenoid replacement should be completed with dry and tight connections
- Minor graffiti removal from irrigation controllers
- Controllers to be kept free of all plant materials, spiders and webs, and any other material that could cause the controller to be non-accessible or damaging to the controller

If contractor fails to keep sprinkler nozzles properly adjusted/aligned to prevent water waste, repair or replace malfunctioning, broken or missing sprinkler heads and/or sprinkler head risers and water waste results, the City of Visalia reserves the right to bill contractor for excess amount of water in addition to assessing a liquidated damage assessment of \$100 per incident. Because It is difficult to estimate the potential losses in water and the costs for City response time to complaints from residents, \$100 has been established as a reasonable assessment.

The Contractor shall prepare a written Irrigation Inspection Report (a report template has been included with this RFB, as a sample for Contractor). The report shall describe any irrigation schedule changes, malfunctions, and necessary repairs. The Irrigation Inspection Report must be submitted with monthly invoice before payment will be made.

- b. **Inspection.** The contractor must inspect all irrigation systems for any malfunction on an interval established by Level of Service assigned for the area. This must be accomplished by utilizing a remote-control receiver to place the controller in test mode and visually inspecting sprinkler operation. This includes, but is not limited to breaks in irrigation lines, irrigation valves, heads, leaks and washouts, saturated areas or dry spots. Contractor must notify Project Manager within twenty-four (24) hours of any malfunctions. Failure to provide notice to the Project Manager may be cause for liquidated damage assessments of \$100 per incident or termination of contract. Because It is difficult to estimate the potential losses in water and the costs for City response time to investigate complaints from residents, \$100 has been established as a reasonable assessment.

Contractor is to track all irrigation locations where plants are missing and maintain irrigation heads until plants are replaced.

Excessive water run off or overflow onto hard surface areas must be kept to an absolute minimum so as not to cause waste of water, pedestrian and/or vehicular liabilities. Problems reported to Project Manager or designated representative will be repaired within twenty-four (24) hours. Failure to complete repair or notify Project Manager of any delay to

VII. GENERAL CONDITIONS

A. CONTRACTING AGENCY

The contract resulting from this Invitation to Bid will be administered by the City of Visalia Parks Maintenance Department. However, the City Purchasing Division shall be the final judge concerning issues or matters related to contract interpretation or problems regarding the terms, conditions, or scope of the contract.

B. TERM OF CONTRACT

The initial contract term shall be for a twelve (12) month period and shall, at the City's option and with the consent of the CONTRACTOR, be extended annually thereafter for four (4) consecutive one-year periods. Contract shall begin on the first of the month immediately following the written Notice to Proceed or as scheduled between City Project Manager and Contractor.

The City will be presumed to request renewal unless the City delivers a thirty (30) day written notice of non-renewal to the Contractor prior to the renewal date.

If Contractor decides not to consent to renewal by the City, then they must provide the City Project Manager with a written notice of non-renewal at least sixty (60) days prior to the renewal date.

Additionally, this Agreement may be terminated for convenience by the City, in whole or in part, by giving the Contractor fifteen (15) days written notice of the intent to terminate whenever the City determines that termination is in the best interest of the City. In the event of termination or expiration of this Agreement, Contractor shall transfer to City any funds and/or accounts receivable on hand attributable to the use of CITY funds.

C. PRICING

All prices quoted in response to this Invitation to Bid shall be firm and fixed for twelve (12) months from the annual anniversary date of the agreement. In order to protect the interests of the City and to give the vendor a reasonable basis for bidding, a price adjustment feature is hereby incorporated into the specifications. Prices bid by vendor may be adjusted annually at time of contract renewal and upon mutual agreement of the parties to the contract to allow for price increases or decreases for labor and benefit rates, supplies and materials.

It will be the responsibility of the contractor to request a price adjustment and to provide all documentation necessary. The request for price adjustment must be submitted to the project manager in writing a minimum of thirty (30) but no sooner than ninety (90) calendar days prior to the annual anniversary date of the agreement. The adjustment of the unit bid price shall not be retroactive and shall apply only to changes incurred after approval.

D. APPROXIMATE ESTIMATE

The quantities given on the bid proposal form and in the contract documents are approximate only, being given as a basis for comparison of bids, and the City of Visalia does not, expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of work, or to omit portions of the work, as the City may deem necessary or advisable, at the prices bid.

E. EXAMINATION OF SPECIFICATIONS AND SITE OF WORK

Bidders shall satisfy themselves by personal examination of the work site(s), specifications, other contract documents, and by any other means as they may believe necessary, as to the actual physical conditions, requirements, and difficulties under which the work must be performed. The submission of a bid shall be conclusive evidence that the bidder has investigated, and is satisfied as to the conditions encountered, as to the character, quality and quantities of work to be performed and the materials to be furnished, and as to the requirements of the proposal and the City.

If the bidder receives an award as a result of this bid submission, failure to have made such investigations and examinations will in no way relieve the bidder from its obligations to comply in every detail with all provisions and requirements of the contract documents, nor will a plea of ignorance of such conditions and requirements be accepted as a basis for claim whatsoever by the bidder for additional compensation.

Any errors, omissions, or discrepancies found in the contract documents shall be called to the attention of the City and clarified prior to the submission of bids.

Should the contractor feel there has been a supplemental or oral modification, it shall be his responsibility to verify said modification in writing prior to submission of the bid.

F. DISCREPANCIES AND MISUNDERSTANDINGS

No bidder shall, at any time after the submission of a proposal, make a claim or assertion that there was any misunderstanding or lack of information regarding the nature or the amount of work necessary for the satisfactory completion of the job. Any errors, omissions, or discrepancies found in the project manual or other contract documents shall be called to the attention of the City and clarified prior to the submission of proposals or proceeding with the described work. The contractor shall be liable for any resultant damage where he recognized such error, inconsistency, or omission and knowingly failed to report it to the City. The contractor will bear no liability for any errors that he discovers and reports to the City.

The bid documents (including all attachments and addenda), Bidder's response to RFB, contract, and purchase order shall constitute the full contract for this project. Should the contractor feel there has been a supplemental or oral modification, it shall be his responsibility to verify said modification in writing prior to the submission of a proposal. Verbal information obtained otherwise will not be considered in awarding of bids.

G. BID FORMS

The City has furnished to each bidder a standard bid form, which, when filled out and executed, may be submitted as his bid. Bids not presented on forms so furnished will be disregarded.

All bids shall give the prices proposed in the spaces provided and shall be signed by the bidder who shall fill out all blanks in the bid form as therein required. No telegraphic bids will be considered.

All bids shall be submitted in a sealed cover and plainly marked as a bid and identifying the project to which the bid relates and the date of the bid opening therefore. Bids that are not properly marked may be disregarded. Bids may be rejected if they show any alteration of form, additions not called for, conditional bids, incomplete bids, erasures, or irregularities of any kind.

When bids are signed by an agent, other than the officer or officers of a corporation authorized to sign contracts on its behalf, or a member of a partnership, a "Power of Attorney" must be on file with the City of Visalia prior to opening bids or shall be submitted with the bid; otherwise, the bid will be rejected as irregular and unauthorized.

H. WITHDRAWAL OF BIDS

Any bid may be withdrawn at any time prior to the time fixed in the public notice for the opening of bids, only by written request for the withdrawal of the bid filed with the Purchasing Manager. The request shall be executed by the bidder or his duly authorized representative. The withdrawal of a bid does not prejudice the right of the bidder to file a new bid. No bid may be withdrawn after the time fixed in the public notice for the opening of bids.

I. DISQUALIFICATION OF BIDDERS

Only one bid may be submitted as a "prime contractor" for the same work by any firm, individual, partnership, corporation, or combination thereof. A contractor submitting a bid as a prime contractor may not also submit sub-bids to other competing prime contractors. Reasonable grounds for believing that any individual, firm, partnership, corporation, or combination thereof is interested in more than one proposal for the work contemplated will cause the rejection of all proposals in which such individual, firm, partnership, corporation, or combination thereof is interested. A contractor who is not submitting a bid as a prime contractor may submit any number of sub-bids to competing prime contractors.

J. OPENING OF BIDS

Bids will be publicly opened at the time, date and place indicated in the Notice Inviting Sealed Bids. Bidders or their authorized agents are invited to be present. Bidders name, location and bid amount will be read aloud. A bid summary will be prepared at that time. No other information will be provided until after bids have been fully examined and accepted. No bids will be received, nor considered, after the time fixed for receiving them. Late bids will be returned unopened to the sender.

K. INCURRING COSTS

The City of Visalia is not liable for any cost incurred by proposers in responding to this Invitation to Bid.

VIII. PROTESTS/APPEALS

Because it is essential that bidders have confidence in the procurement procedures for soliciting and awarding contracts, it is the policy of the City to offer bidders the opportunity to appeal award of contracts. The following procedures shall apply in regard to appeals:

1. Any actual bidder who is aggrieved in connection with this RFB or award of a contract hereunder may protest to the City of Visalia Purchasing Division in writing within five (5) working days after such aggrieved bidder knows, should have reasonably known, or could reasonably be expected to know, of the facts giving rise thereto; and

- The City reserves the right to assess a \$100 liquidated damage assessment per incident over and above the cost to correct the unsatisfactory condition for failure to perform any part of the work covered in this contract. Because it is difficult to estimate the potential costs to the City in responding to resident complaints over such conditions, \$100 is set as a reasonable estimate of potential costs to the City in responding to a failure by the Contractor.

D. EXTRA WORK

The contractor shall do no extra work except upon written order from the City. For such extra work the contractor shall receive payment as agreed upon in writing. The contractor shall furnish the project manager with report sheets in duplicate for each day's extra work no later than the working day following the performance of said work.
